Professional profile

I'm a studious PHP developer with soft spot for developing creative and innovative solutions for web-related problems. I try to use strong architectures and clean coding techniques as a solid foundation for all my work, supplemented with the latest web technologies to ensure the best possible result. I'm proficient in agile development methodologies such as scrum, XP and Kanban to ensure an efficient work flow with both customers and team members. Also I'm very fond of teaching new skills to others, be it programming, methodologies or other ideas.

Skills

Programming: object-oriented PHP 5.2-7, XHTML/CSS, MySQL databases Laravel 4-5, Symfony 2-4, PHPUnit 3.6-5.0, CodeCeption, Mockery, Docker, vagrant, Apache2, SASS, Webpack, VueJS, Vuex, OAuth, REST, Wordpress, Drupal

Methodologies: Pair programming, Domain Driven Development (DDD), Test Driven Development (TDD), Agile Software Development, Scrum, XP, Kanban, Object-Oriented Programming (OOP), Model View Controller (MVC) pattern, REST, Continuous Integration

Other skills: Presentations, teaching, analysis, copywriting

Freelance work experience

Freelance web developer at E-Contract BVBA
2019-06 - present

Continued development of the CRM web application which I worked on for several years in the past. In addition, the position also includes maintenance of a Wordpress front-end application as well as calculation and comparison systems that are used in the background.

Functional requirements: customer, contract and billing management, comprehensive reporting in HTML views as well as extensive CSV exports, lead aggregation and follow-up campaigns

Used technologies: Git, PHP 5.6-7, PHPUnit 4-5, MySQL, Apache2 web server, HTML/CSS, Laravel 5, Wordpress 4, CakePHP, jQuery 2.2, NPM, Grunt, SASS, REST

Freelance web developer at Koalaboox BVBA
2019-03 – 2019-05

Implementation of several new modules into an existing application, among which a public facing API and an anti-fraud system.

Functional requirements: Customer management, invoice management, anti-fraud detection

Used technologies: Git, Docker, PHP 7.2, Laravel 5, MySQL, Apache web server, SASS, REST, Codeception, OAuth, Laravel Passport, microservices

Freelance web developer at Yappa BVBA
2018-01 – 2018-07

Development of custom web applications in PHP using the the Symfony framework. While the main focus of my responsibilities were focussed on back-end development, there was also a significant front-end component within these projects.

Functional requirements: stock and stock management, QA ticket management and follow-up, custom modules for document ant quality label registration and tracking and extensive dashboards with statistics and reporting

Used technologies: Git, Docker, Docker Compose, PHP 7.2, Symfony2, Symfony3, Doctrine, PHPUnit, MySQL, Apache web server, Mailhog, LESS, SASS, REST, Webpack, VueJS, jQuery

Freelance web developer at Hiddit BVBA
2017-06 – 2017-12

Maintenance and Development of custom web applications in PHP and Wordpress to facilitate the growth of a New e-commerce startup in the food supplement industry.

Functional requirements: order follow-up and reporting, workout planning

Used technologies: Git, PHP 7.2, Laravel 5, PHPUnit, MySQL, Webpack, VueJS, jQuery

Freelance web developer at E-Contract BVBA
2013-10 – 2017-04

Development of a CRM application in order to manage the internal operations of the company. This includes customer management, contract management, reporting, billing and much more. This project is currently in development for over three years and is actively used on a daily basis by 10 people.

Functional requirements: customer, contract and billing management, comprehensive reporting in HTML views as well as extensive CSV exports, lead aggregation and follow-up campaigns, several complicated imports of data from old, deprecated systems into the CRM

Used technologies: Git, PHP 5.6-7, PHPUnit 4-5, MySQL, Apache2 web server, HTML/CSS, Laravel 4-5, Twilio, jQuery 2.2, Algolia, NPM, Grunt, SASS, REST

Employee work experience

Agile coach/PHP Developer at Cegeka NV
2012-10 – 2015-06

Worked on various projects for multiple customers. The majority of my time was spent on the Telenet e-sales project (16 months), where I was responsible for the introduction of

and training in agile software development methodologies. Some other projects and/or customers include Flanders' Drive (Lommel), VDAB/madewithlove (Brussels), the Flemish Government and Trane.

Java Developer at Cegeka NV
2012-01 – 2012-09

Junior member of a team of more than 15 developers, responsible for maintenance and development of new features for the Java/J2EE Ventouris application.

Education
Master in computer science, information technology, Hasselt University
2006-10 – 2012-01

Specialisation: Multimedia and networking
Master thesis: 3D Tracking Using Wiimotes
